# Wabash Capstone Project Notes 08

By: John Danison

# What Did I Say I Would Do This Week?

- Continue to support lab testing as requested.
- Continue to develop data offloading software.

# What I Have Done Over The Past Week

- Performed lab testing on Kingpin assembly.
- Added features to Wabash data offloading software.
- Attended meetings and class.
- Contributed to Capstone Poster.

# Wabash Lab Testing

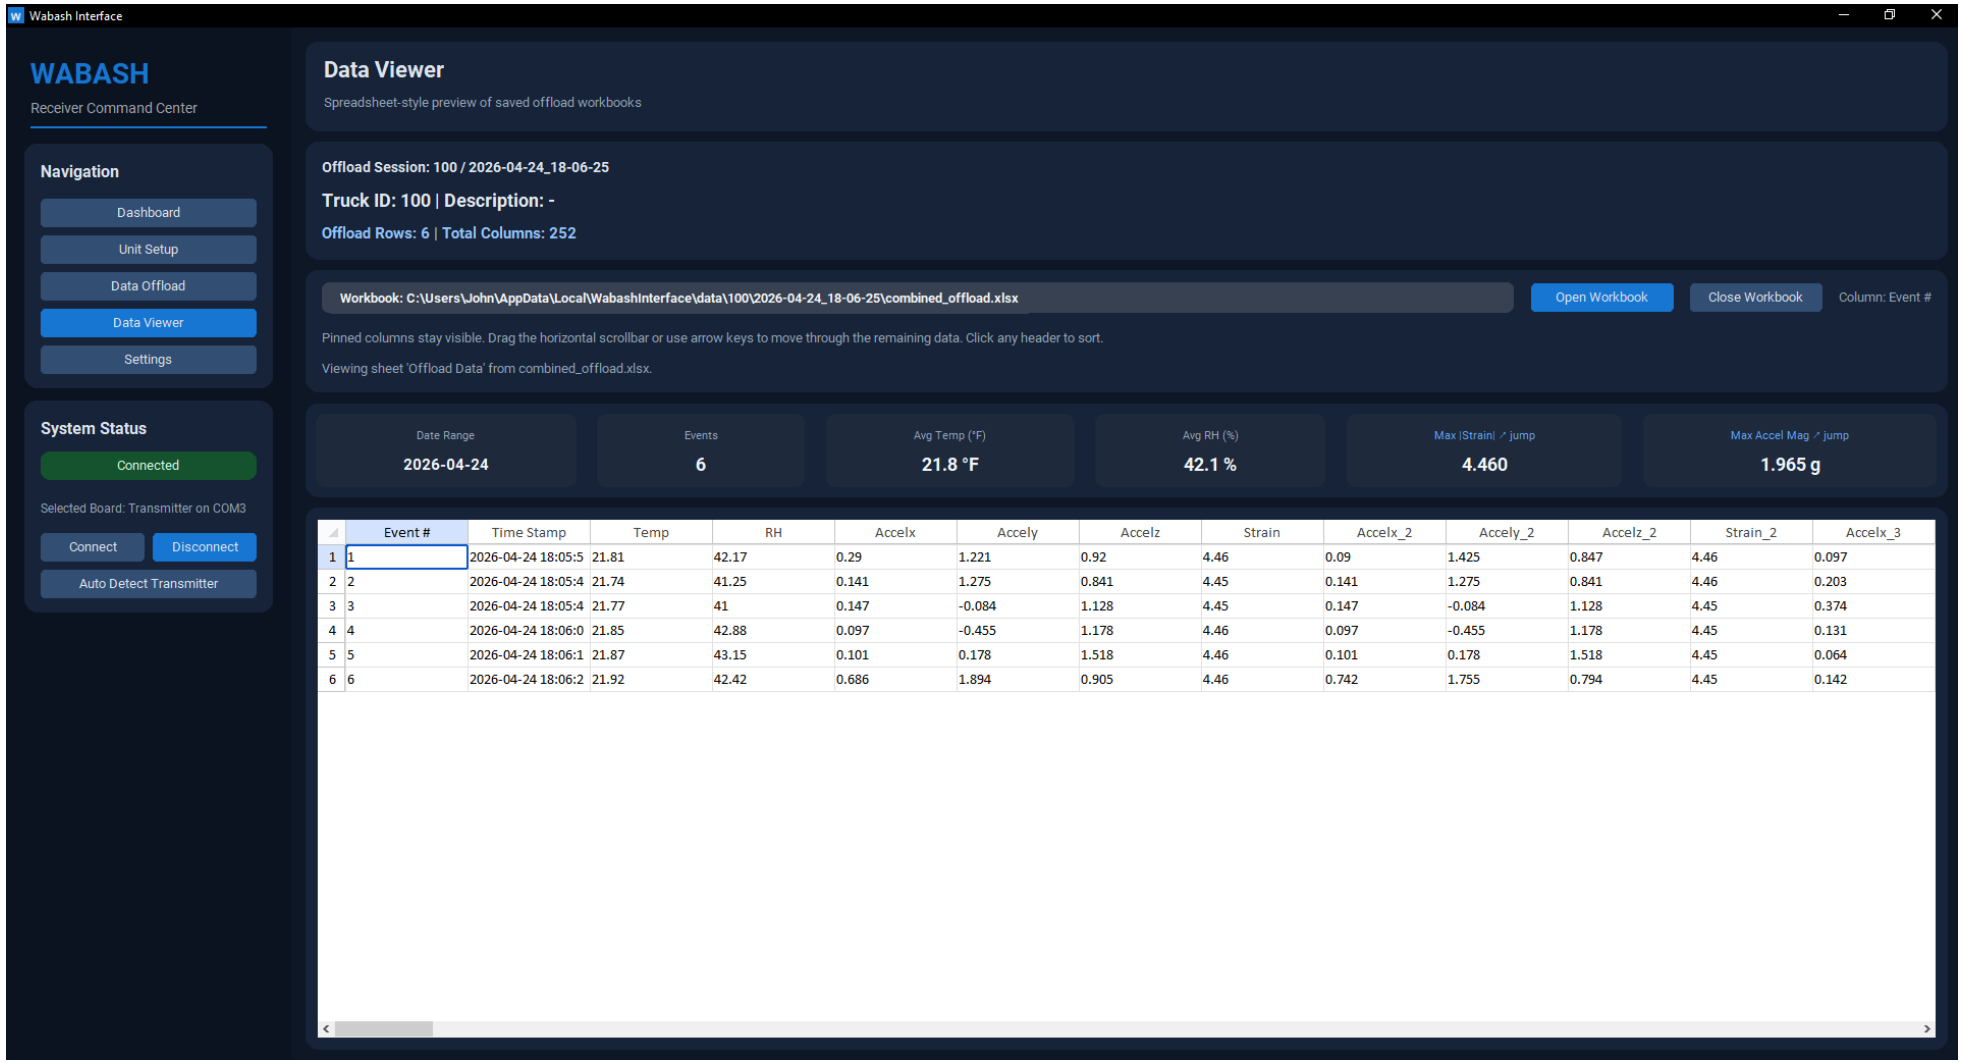
Went to Wabash:

- Attached system to their rig
- Gathered data
- Troubleshot issues
- Showed offloading software

# Wabash Software Updates

Software Changes:

- Added data viewer screen
- Fixed offloaded data configuration
- Fixed LoRa fall back & Multiple Wi-Fi configuration setup



| | Event # | Time Stamp | Temp | RH | Accelx | Accely | Accelz | Strain | Accelx_2 | Accely_2 | Accelz_2 | Strain_2 | Accelx_3 |

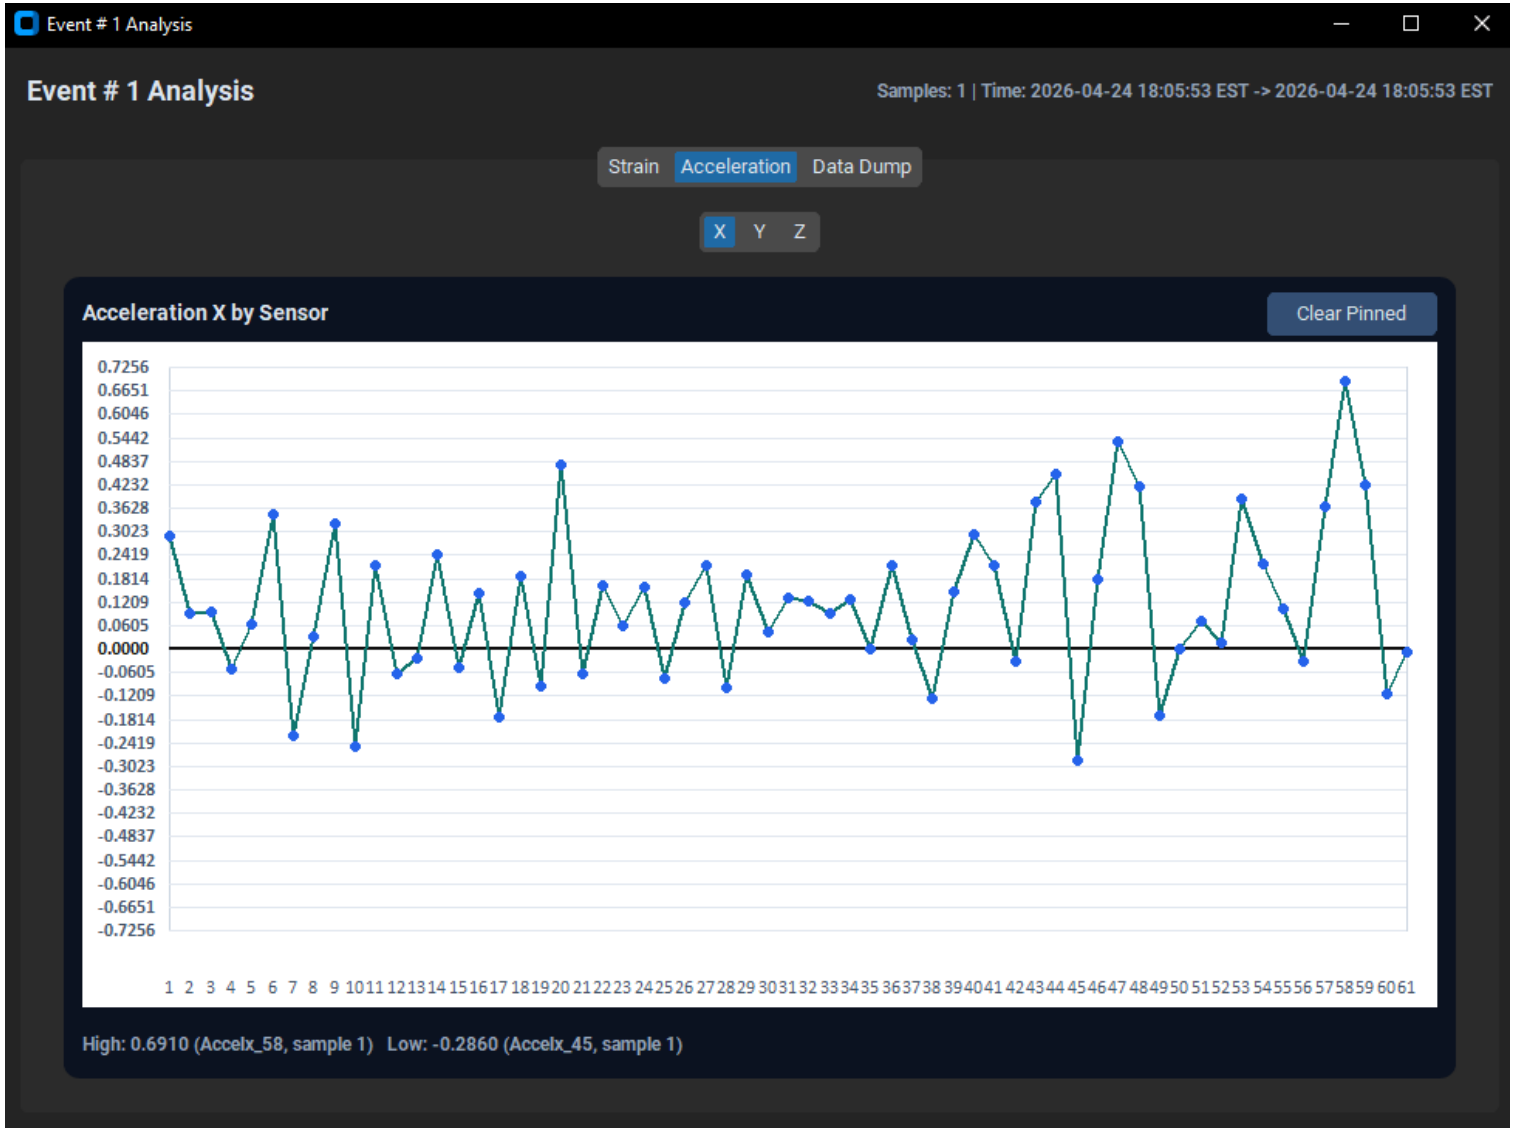
| 6 | 6 | 2026-04-24 18:06:2 | 21.92 | 42.42 | 0.686 | 1.894 | 0.905 | 4.46 | 0.742 | 1.755 | 0.794 | 4.45 | 0.142 |

# Wabash Software Updates

Software Changes:

- Added data viewer screen
- Fixed offloaded data configuration
- Fixed LoRa fall back & Multiple Wi-Fi configuration setup



# Did I Do What I Say I Would Do?

I feel that I accomplished everything that I said I would do over these past couple weeks.

The data offloading software is practically finished!

I attended all lectures, labs, and meetings w/ the client.

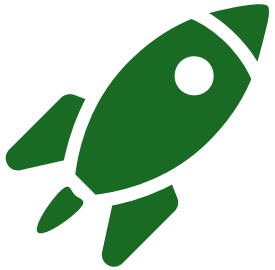
# Plans For Upcoming Weeks

## High Level

Continue to develop data offloading software.

Continue to show up to class.

Continue to support lab testing as requested by the team.



## By EOW:

Continue to add client feature requests in data offloading software.
